

When your
EHR Implementation
Is Finally
Behind You...

Optimizing your EHR is what's in front of you.

HEI Global Health (HEI) is here to assist with the optimization of your Oracle Cerner Millennium EHR. Optimizing the patient journey, as well as the clinician workflows helps to realize the full value of your investment. Our goal is to fix today's issues, and to develop workflows and processes with tomorrow in mind.

HEI Global Health Establishes Workflows to Support Organizational Goals

Ensure Effective Workflows

Evaluate and develop specific workflow and process improvements across all healthcare systems to ensure the shared goal of cooperation amongst the entire patient care team. Create benchmarks and review key performance indicators to track the effectiveness of changes made.

Expand System Efficiency

We bring our extensive knowledge of the Millennium workflows to significantly improve the efficiency of your EHR system. Utilizing our optimized solutions can increase the clean claim rates, lower claim denials, reduce AR days and expedite cash collections.

Enhance User Experience

Creating solid communication plans with properly executed optimization roadmaps, along with reviewing key performance indicators and benchmarks will enhance the user experience and reduce clinician burn-out.

HEI Global Health (HEI) is a strategically aligned team of Healthcare Information Technology professionals offering a robust suite of services for domestic and international clients. HEI continues to be an independent Go-To Resource for Oracle Cerner and Oracle Cerner Clients around the world.
